Art Unit: 1631

Applicant is asked to submit a clean copy of the claims with his next response in order to clarify the record.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 31, 33, and 34 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 37 of copending Application No. 08/253,843 and claims 31, 33, and 34 of copending Application No. 08/449,930. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method claims overlap in scope. Applicant's offer to submit Terminal Disclaimers or to cancel conflicting subject matter is acknowledged.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 31 and 34 are rejected under 35 U.S.C. 102(g) as being clearly anticipated by either one of Sugano et al (U.S. Patent No. 5,514,567) or Sugano et al (U.S. Patent No. 5,326,859). This rejection is repeated for reasons already of record (e.g., Office action mailed November 7, 2003, pages 2-3). Applicant's arguments (response filed March 19, 2004, page 3) are not convincing because each of the references teaches as much about treatment of human cancers or tumors as does the instant application. Applicant is further correct in that the court awarded priority to Sugano (*Fiers v. Sugano*, 25 USPQ2d

Art Unit: 1631

1601, CAFC, January 19, 1993) based upon the DNA encoding beta interferon. Since the claims require the use of the DNA to produce the polypeptides used in the claimed methods, the rejection of the claims under 35 U.S.C. § 102(g) is appropriate. (See also the discussion in *Fiers v. Sugano* on pages 1604-1605 in connection with conception and product by process claims).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
